

# SETTINGAN TELKOMSEL FLASH PADA HANDPHONE

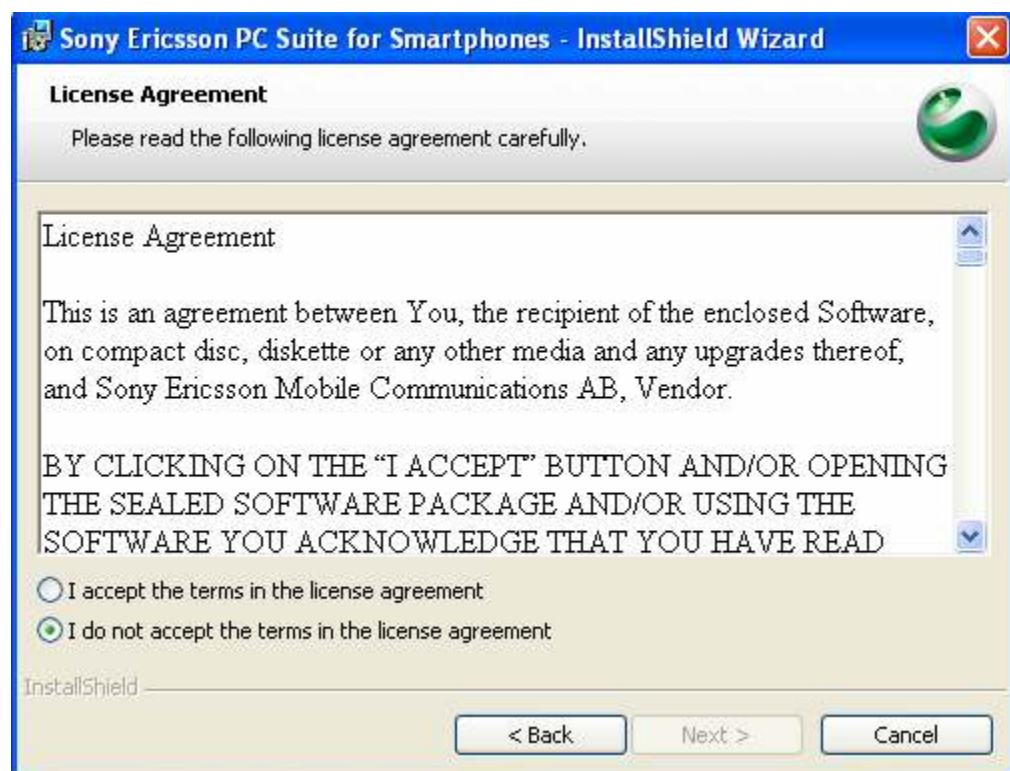

## SONY ERICSSON

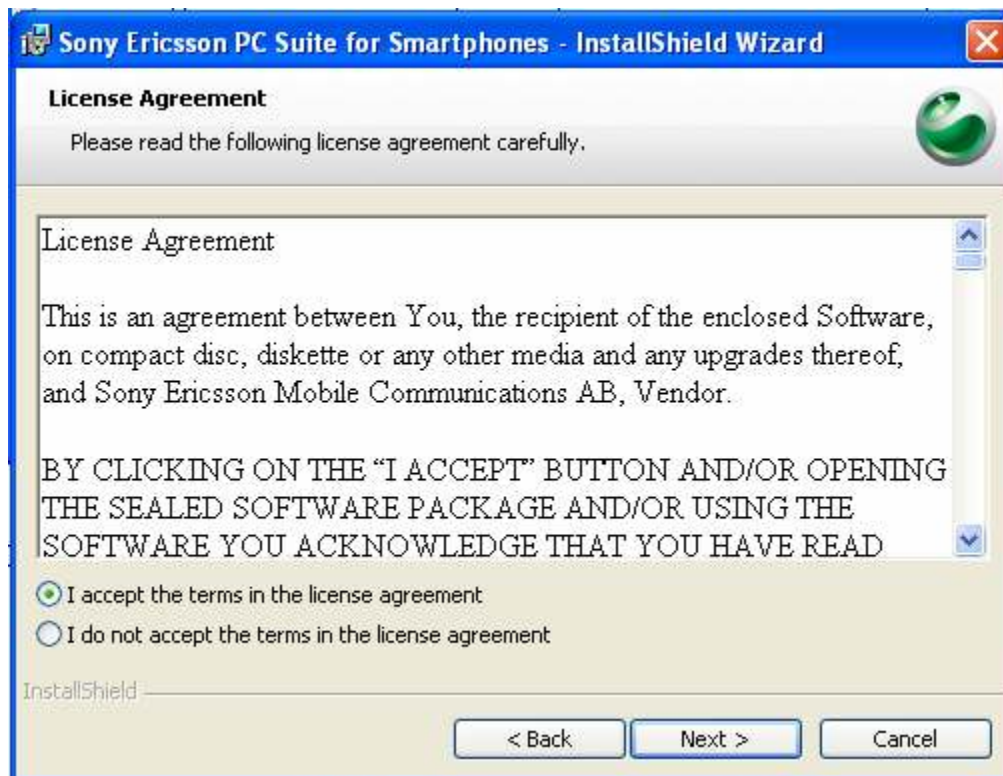

### I. Install PC Suite Sony Ericsson pada PC/Laptop

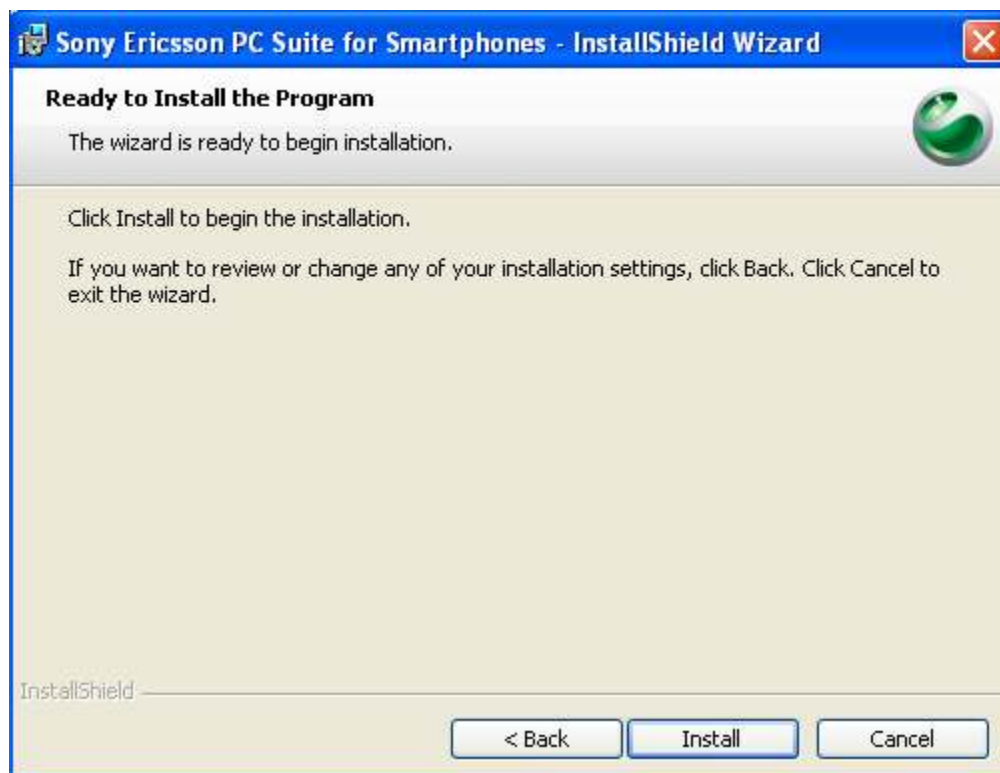

Ikuti langkah-langkah seperti di bawah ini :

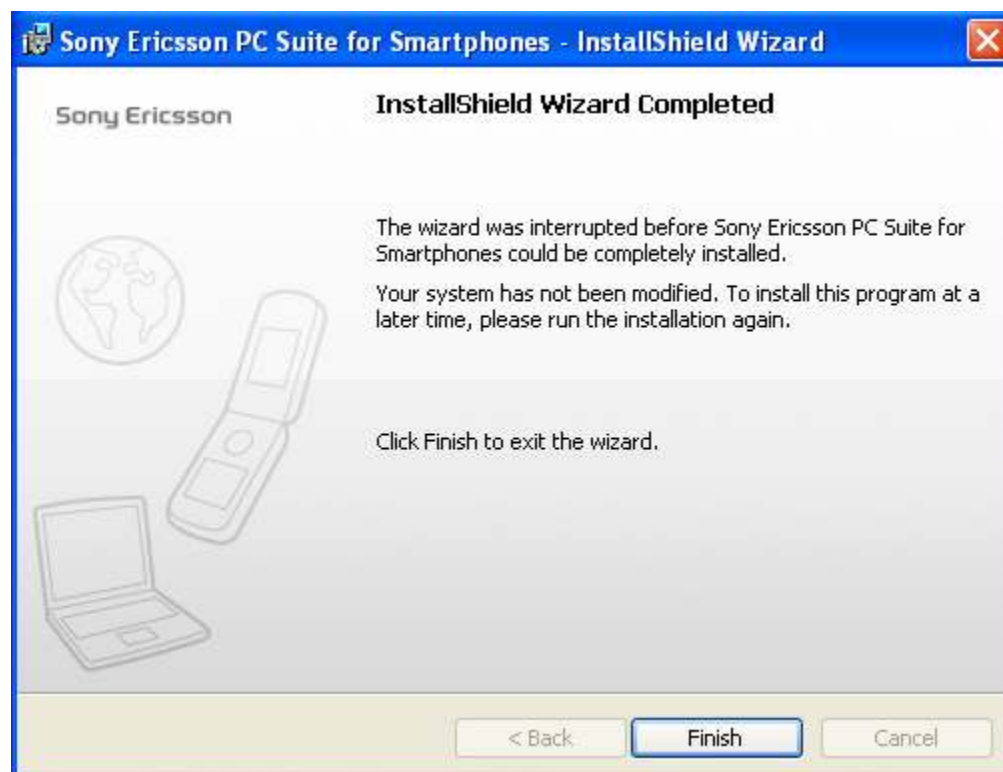

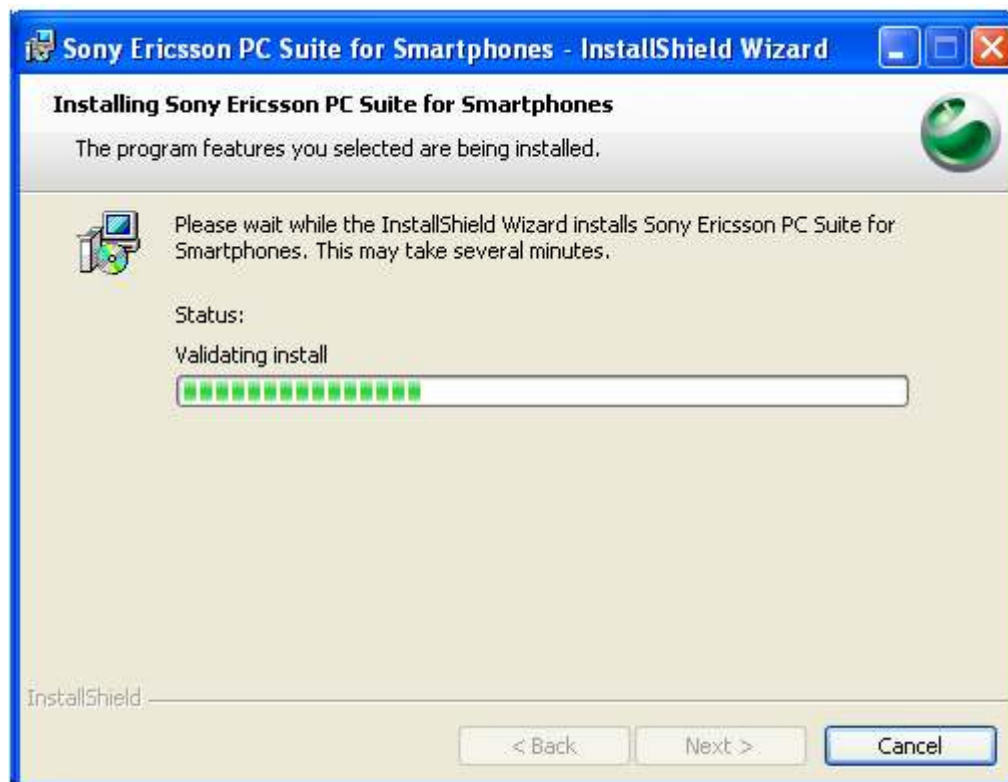

## II. Setting Handphone Sony Ericsson

1. Hubungkan phone dengan PC melalui kabel data maka layar akan memunculkan tampilan seperti di bawah ini, dan silahkan pilih menu “Phone Mode”

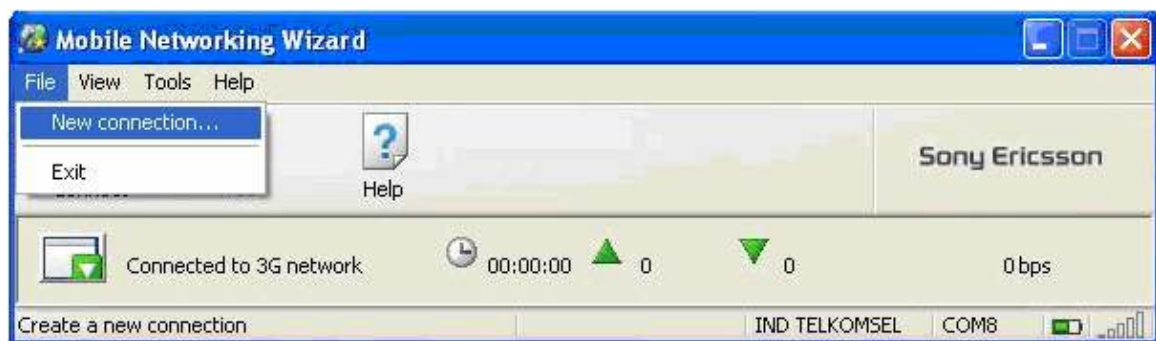

## III. Setting PC

1. Klik ikon PC suite Sony Ericsson pada sisi kiri bawah berlogo handphone

2. Menu PC Suite > Mobile Networking Wizard > New Connection

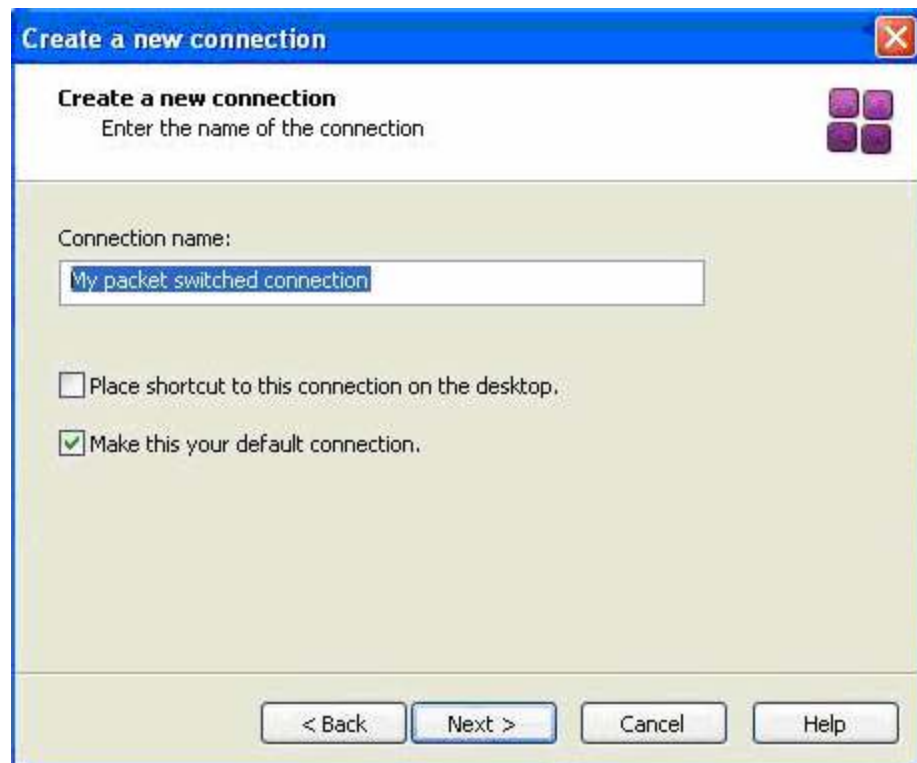

3. New Connection > Packet Switched Data

4. Connection Name

## 5. Manual Mode

The screenshot shows a Windows-style dialog box titled "Create a new connection" with a close button (X) in the top right corner. The main heading is "Create a new connection" and the subtitle is "Select service provider". There is a four-square icon in the top right. A checkbox labeled "Use settings from an existing entry in the mobile phone." is unchecked. Below it, a section titled "Select the Wizard mode:" contains the text "Use settings for this mobile service provider:". A dropdown menu shows "<use default settings>". Two radio buttons are present: "Automatic mode" (unchecked) and "Manual mode" (checked). Under "Automatic mode" is the text "You will be asked to choose between options only if necessary.". Under "Manual mode" is the text "You will be presented the predefined values and given the choice to accept or to modify them.". At the bottom are four buttons: "< Back", "Next >", "Cancel", and "Help".

**Create a new connection**

Select service provider

☐ Use settings from an existing entry in the mobile phone.

## 6. Isi APN > Advanced

The screenshot shows a Windows-style dialog box titled "Create a new connection" with a close button (X) in the top right corner. The main heading is "Create a new connection" and the subtitle is "Specify the Access Point Name (APN)". There is a four-square icon in the top right. A text field labeled "Access Point Name (APN):" contains the text "flash". Below the text field is the text "(leave blank to use default)". A horizontal line separates this section from the next. Below the line is the text "Before changing the advanced settings, check with your service provider if this is required.". Below this text is a button labeled "Advanced settings...". At the bottom are four buttons: "< Back", "Next >", "Cancel", and "Help".

**Create a new connection**

Specify the Access Point Name (APN)

Access Point Name (APN):

flash

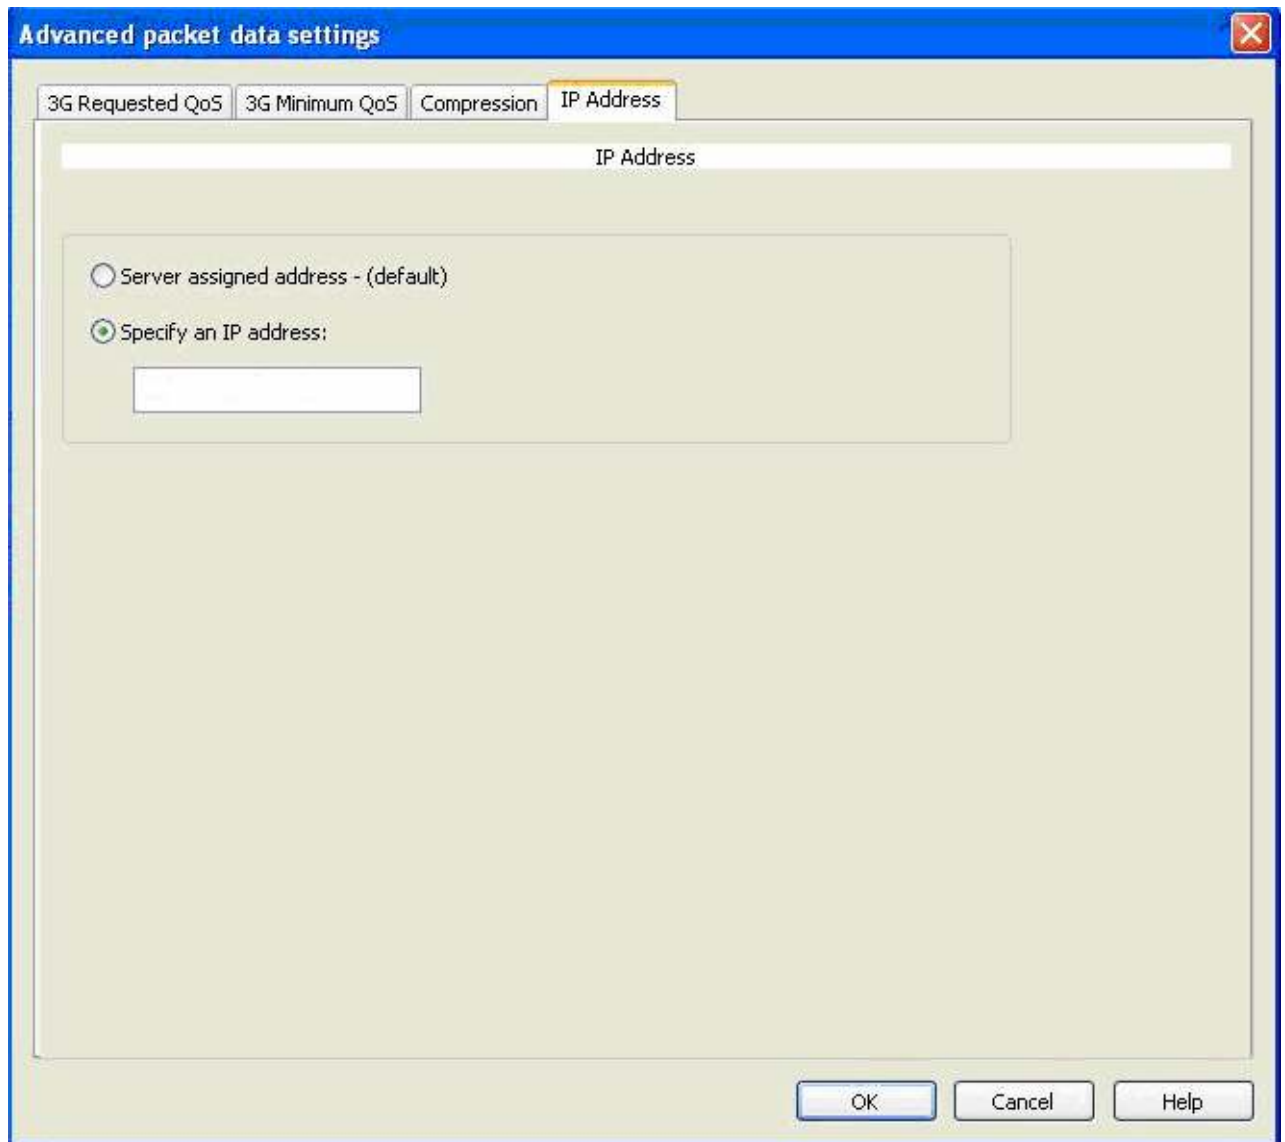

(leave blank to use default)

Before changing the advanced settings, check with your service provider if this is required.

7. Advanced Settings > IP Address > Specify an IP address :

The image shows a Windows-style dialog box titled "Advanced packet data settings". It has a blue title bar with a close button (X) in the top right corner. Below the title bar, there are four tabs: "3G Requested QoS", "3G Minimum QoS", "Compression", and "IP Address". The "IP Address" tab is currently selected and highlighted. Inside the dialog, there is a large text input field at the top labeled "IP Address". Below this field, there are two radio button options: "Server assigned address - (default)" and "Specify an IP address:". The "Specify an IP address:" option is selected, indicated by a small green dot. Below this option is a smaller text input field. At the bottom right of the dialog, there are three buttons: "OK", "Cancel", and "Help".
